Analytics

This report plots students enrolled in a LearnJCU subject against two variables: the   and one of several   that can be selected.
This report can help analyse how different student activity types do (or do not) relate to the grades recorded in the Grade Centre.

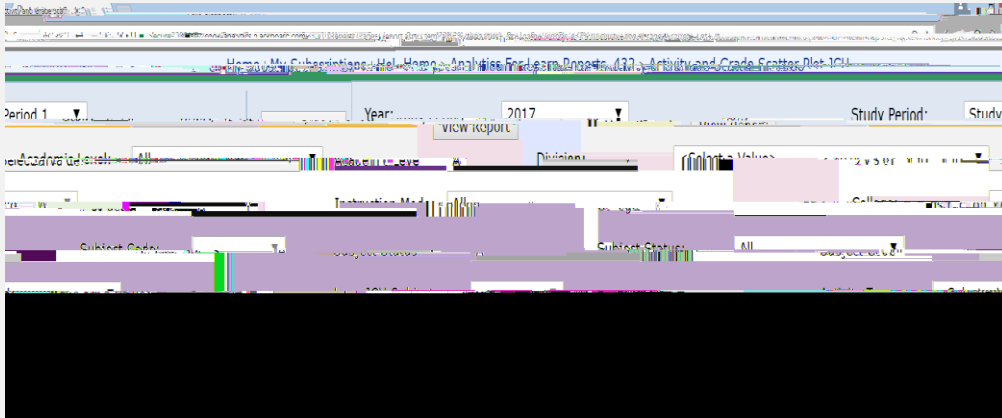

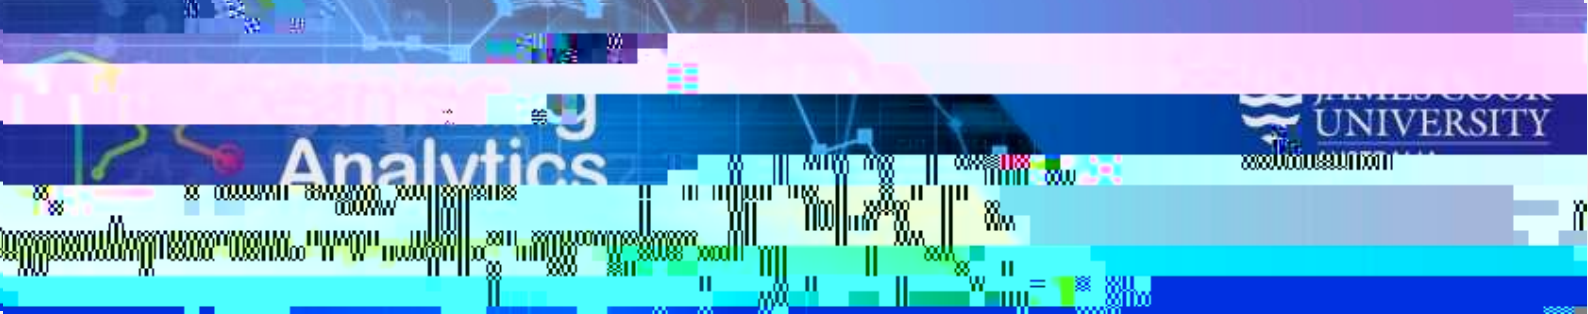

Handy tip!

To get the best out of this report, the Grade Centre data needs to be recorded accurately. See the **Useful Information** *section in this quick guide for some handy tips and tricks.*

Select   to login with the Blackboard login

Select the year which you wish to run the report for.

Study period refers to the academic Study Periods at your institution (e.g. Study Period 1, 2015). Selecting a Study Period automatically filters down the LearnJCU Subjects that can be selected.

This refers to the organisational units at your institution (e.g. Division of Tropical Environments and Societies). Selecting a division automatically filters down the LearnJCU Subjects that can be selected.

This refers to the academic levels at your institution (e.g. Undergraduate). Selecting an Academic Level filters down the LearnJCU Subjects that can be returned by the report.

This refers to the college organisational units at your institution in the Division selected (e.g. College of Arts, Society and Education). Selecting a college automatically filters down the LearnJCU Subjects that can be selected.
